Dear Hiring Manager,

My name is Sondre Kuven, and I am currently studying frontend development. I am looking for opportunities where I can continue learning, contribute to real projects, and grow as a developer.

Through my studies I have worked with HTML, CSS JavaScript, responsive design, accessibility, API-based websites and GitHub. I especially enjoy the visual side of frontend development, such as CSS, layout spacing, hover effect, and making websites feel clear and user friendly.

Before studying frontend development, I completed a bachelor's degree in music and later practical pedagogical education. This background has given me experience with creativity, discipline, communication and working consistently to improve. I believe the skills are useful in frontend development, where both technical structure and attention to detail are important.

I am still early in my development journey, but I am motivated, curious and eager to keep improving. I enjoy learning by building projects, solving problems and refining my work step by step.

Thank you for. Taking the time to read my application. I would appreciate the opportunity to contribute, learn and continue developing as part of a team.

Kind regards,

Sondre Kuven
